

## **PUBLIC FORUM – 6:00 pm - 7:30 pm 20<sup>th</sup> August 2007**

### **Moderator: Bernadette Young**

The City of Mandurah presents a FREE public forum on Climate Change and the Coast, at Mandurah Performing Arts Centre 20<sup>th</sup> August 6:00pm-7:30pm.

The open evening of questions will follow on from the climate change conference hosted by the City of Mandurah earlier in the day. Bernadette Young from ABC Radio 720 will be directing your questions to a panel of experts, including key note speakers: Dr. John Church, Senior Principal Research Scientist for CSIRO and Dr. Ian Eliot, Senior Lecturer for the Department of Earth and Geographical Sciences at UWA and a representative of the Western Australian Marine Science Institution (WAMSI). Local government and council representatives will also be on hand to answer community based questions.

This is a FREE forum for anyone interested in the effects of climate change on West Australia's coast line. There is NO need to register for this part of the day, just turn up at the Mandurah Performing Arts Centre before 6pm.

For more information on the Public Forum or on Climate Change and the Coast conference contact:
