Description: The Woods is an exhibition that contrasts the variety of different mediums and ideas explored by a close family of artists. Mother, father, daughter, three sons and their partners are all artists. From oil on canvas through to photography, ceramics, sculpture and house paint on household objects, The Woods is a visual example of the natural way in which a family clashes but can also get along. The Woods will challenge as well as confirm the notion that we are the sum total of our environment.
