Web: www.wavisitorcentre.com

Statewide options for accommodation,
holiday and sightseeing available.

TOURISM WA www.westernaustralia.com

The West Australian Government Tourist Centre produces a Holiday Guide each year, featuring around the State Holiday accommodation, plus wildflower locations with local maps to assist their location. The 2007 edition is an attractive brochure; some are available now at the Gold Coast as a helpful guide. Also for further wildflower locations www.westernaustralia.com/wildflowers

Note Comment:

Wildflowers are an elusive sight, provided Nature has supplied sufficient rain followed by sufficient ratio of SUNSHINE, the flowers will bloom in all their glory. Thus, the website to advise you of where the latest group is located, making us very proud to show you where they are so the visitor is not disappointed.

As a rule of thumb:

North of Perth, the wildflowers bloom in August. In the Perth area, the flowers will bloom in mid to late September. Our great Southern area, the roadside and National Parks are glorious in October. Happy hunting in 2008.
