

CARAVAN PARK ACCESS KEYPAD

KPCP

The key to keyless entry.

Neatrol Systems

www.neatrol.com.au

The KPCP keypad and KPCP PC software enables caravan park managers to allocate 4, 5 or 6 digit PIN codes to the tenants of up to 1000 sites. Any site's PIN code can be given an automatic expiry date and time or can be set to permanent for long term residents. PIN codes can be typed in manually by the user or randomly selected by the program. Regardless of how the PIN code is selected, automatic scanning ensures that all codes in the database are unique and therefore not duplicated in the system.

Features:

- Tactile and audible keypad feedback.
- System configurable for 4, 5 or 6 digit PIN codes
- Up to 1000 sites can be configured with guaranteed unique PIN codes.
- Automatic expiry of codes for short term tenants.
- Simple and intuitive PC software minimizes complexity and maximizes efficiency.
- Rugged anodised aluminium and zinc steel housing.
- Wholly designed and manufactured in Australia.

Applications:

- Caravan Parks
- Car park control.
- Hotel swimming pool and similar access.
