

## PACDL Data Logger

The PACDL (Presco™ Access Control Data Logger) offers an affordable access control package for up to 8 access points when used with the PAC series door access controllers. The Data Logger provides a user friendly platform for access control with the ability to store data and program your access control system locally or on a PC.

### Features

- Store 6,000 events and 400 users details
- Up to 4 Presco™ decoders can be monitored simultaneously
- RS232 interface to your computer or serial printer
- Store codes, names, events and setup data for up to 17 days without power
- Real time clock and calendar
- Events are stored with time and date stamp

With the Presco™ system the door controller and reader are separated, allowing the controller to do the code processing in a remote protected environment. The code is transmitted from the reader using only two wires, making installation simple and cost effective. The door controller and reader can be separated by up to 1 kilometer using low cost 4 core non-shielded cable!

"When you're serious about security"

**NIDAC**

## PACDL Data Logger

The **PACDL** (*Presco™ Access Control Data Logger*) offers an affordable access control package for up to 8 access points when used with the **PAC** series door access controllers. The **PACDL** makes programming multiple **Presco™** door access controllers a breeze, providing a user friendly platform for access control with full upload/download capabilities directly from the **PACDL** or your PC. Maximum security is provided with 3 different operator levels for programming, editing user details or simply viewing events. When an event is logged it is locked into memory and cannot be manipulated, so you know the integrity of your access control system is assured.

### Features

- User names can be up to 12 characters in length
- 20 character x 2 line LCD display with backlighting
- 20 key keyboard
- Operator code for viewing events in the history buffer
- Three levels of operator codes to restrict access to setup menus
- Full upload/download capability

## Other Products In The Presco™ Family

### PAC1 and PAC2 Door Access Controllers

The **Presco™ PAC** (*Presco™ Access Controller*) door access controllers utilise the latest microprocessor technology to operate an electric door locking device. Together with a **Presco™** encoder (or other devices with the addition of a **Presco™ Interface Module** model **PIM**) the **PAC** offers affordable access control to restricted areas for up to 400 users.

### PRE Standard Keypad

The **PRE** (*Presco™ Remote Encoder*) is designed to be used with the **PAC** series door access controllers in areas where keypad security is desired, but weather and vandal resistance is not a priority. When a **PRE** is coupled with any **PAC** series door access controller you get the benefits of a secure door access control solution with all of the features of the **Presco™** system.

### PIM Interface Module

The **PIM** (*Presco™ Interface Module*) can be used to convert commonly used data formats to either **Presco™** or Wiegand format. Formats supported include Wiegand, Clock & Data and **iButton™**.

### PRX Indoor Proximity Reader

The **PRX** proximity reader is an advanced, self contained **Radio Frequency IDentification** (RFID) contactless reader designed to be used in conjunction with the **PAC** series door access controllers in areas where proximity security is desired, but weather resistance is not a priority. It can also be interfaced with most Wiegand input access controllers.

### Sprite Outdoor Proximity Reader

The **Sprite** proximity reader is an advanced, self contained **Radio Frequency IDentification** (RFID) contactless reader designed to be used in conjunction with the **PAC** series door access controllers in areas where proximity security is desired, and weather resistance is a priority. It can also be interfaced with most Wiegand input access controllers.

### PSE Rugged Keypads

The **Presco™ PSE** is a vandal and weather resistant keypad designed to be used in harsh environments. Simply add a **PSE** to a **PAC** access controller to get all of the features of the **Presco™** system, with the added benefit of rugged durability.
