

# BioWater<sup>®</sup> 200 ionizer/filter

## VALUE. POWER. SIMPLICITY.

Discover the BioWater 200 - the latest technology water ionizer and filter in Australia. This health powerhouse easily produces high volumes of *BioWater* for safe drinking and cooking. Simply connect the BioWater 200 to a tap for energized, effective and healthy hydration at the push of a button. It's that easy.

### Exceptional value for money

The BioWater 200 offers the latest in water ionization technology at an affordable price. Other "pure water" sources like bottled water aren't just expensive - they also contribute to environmentally unfriendly plastic petrochemical waste and landfill. The BioWater 200 is a direct source of hydration that quickly pays for itself. For features, value and health benefits, no other water treatment system comes close.

### Easy to use

The BioWater 200 is easy to use, does not require a plumber for connection, and comes with a twelve month warranty. It's also portable for easy relocation, and can be bench or wall-mounted in any home or workplace.

### Simple, safe water ionization

The BioWater 200 uses a simple process of electrolysis to produce high volumes of alkaline, energized *BioWater* - a safe, oxygen-saturated, anti-aging and rapidly hydrating drink. *BioWater* has a great, fresh taste. It's easy to drink on a daily basis, and offers numerous health benefits. Hydrate regularly with *BioWater* to help flush out disease-hosting acid wastes at the cellular level.

### Antioxidant potential

A negative ion charge provides beneficial antioxidant potential. It fights harmful, positively charged free radicals and reduces oxidation damage in the body.

With the BioWater 200, you can hydrate yourself with these benefits. Only a water ionizer connected to power can produce a negative ion charge in water. Freshly ionized *BioWater* has the same negative ion charge as fresh, raw organic fruits and vegetables.

### Powerful dual filtration

The BioWater 200 features dual filtration - an internal, long-life 0.1 micron filter, plus a FREE 5 micron pre-filter for extended filter durability. The BioWater 200 filters out chlorine, insecticides, pesticides, hormones, dangerous bacteria like cryptosporidium and giardia, viruses, and numerous water-borne chemicals. Discover cleaner, fresher, healthier water with the BioWater 200.

### Alkaline hydration on tap

Blood, saliva and spinal fluid are naturally alkaline, and maintain a pH level very close to 7.4. Alkaline, hydrated blood cells loaded with oxygen are naturally resistant to degenerative disease.

By contrast, dehydrated, acidic and anaerobic (oxygen deficient) cells allow degenerative disease to thrive.

The body, however, can acquire acidic build-up through various lifestyle choices - food, drink, stress, or certain medications.

Carbonated fizzy drinks, popular among young and old alike, have extreme acidity levels of pH 2.8. Phosphoric acid is added to these beverages to extend shelf life.

This acid leaches aluminium, a toxic heavy metal, from the cans used to store soft drinks. One can of soft drink can contain eight teaspoons of refined white sugar, which turns straight to acid in the body.

Diet plays an important role in maintaining the alkaline/acid balance. Controlling pH intake by drinking alkaline *BioWater* can help restore blood's normal alkaline level, which is fundamental to good health and immunity.

The BioWater 200 features **four alkaline water settings**, one neutral water setting, and one acidic water setting. Simply choose the pH setting that suits your need.

**Alkaline 1:** Produces *BioWater*, a drinking source for rapid, effective cellular hydration.

**Alkaline 2:** For beverages. Counters acids in tea, coffee, alcohol (hangovers).

**Alkaline 3:** For cooking. Counters acids in rice, wheat, oats.

**Alkaline 4:** For cooking. Counters acids in protein, meat, stews, protein powders.

**Neutral:** pH neutral - filtered, not ionized.

**Acidic:** For cleaning and more. With its natural antibacterial qualities, acidic water is excellent for chemical-free cleaning. Wash skin, hair, extend the life of fresh produce, or use acidic water to boost plant growth.

### Enriched with Okinawan coral calcium

The BioWater 200 features a specially designed inlet to enrich your drinking water with alkaline, premium-grade Okinawan coral calcium. This inlet provides the perfect 2:1 ratio of calcium to magnesium for maximum absorption. Obtained from naturally broken-off pieces of coral reef, Okinawan coral calcium is a vital nutrient and completely natural product. Drinking *BioWater* is the easy way to fortify your diet with the healthy benefits of calcium.

### How does it work?

Simply connect the BioWater 200 to a tap with the diverter included. Tap water passes from the tap into the BioWater 200 unit. Inside, it is finely filtered, ionized and separated into its two components:

1. Alkaline water - For drinking and cooking.
2. Acidic water - A natural antibacterial. Perfect for chemical-free cleaning and more.

## Benefits of BioWater

### Anti-aging

Ordinary tap water can cause oxidation, which results in harmful chemical reactions in both organic and inorganic matter. Oxidation causes body cells to age. It causes disease. It wrinkles skin and rusts metal. The Oxidation Reduction Potential (ORP) in *BioWater* helps neutralize oxidizing effects. In the simple test below, each jar contains two steel nails. *BioWater* was added to the jar on the left. Melbourne tap water was added to the jar on the right.

#### BioWater

*BioWater* significantly slowed the rusting and deterioration of these steel nails.

Copyright 2006 BioNatural Australia Pty Ltd

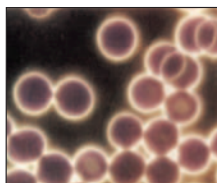

#### Tap water

Oxidation caused by tap water accelerated the deterioration of both steel nails. The thick, dark colour is rust.

### Rapid cellular hydration

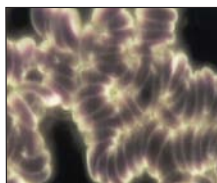

#### Hydrated live blood cells

The photo on the left shows the healthy, hydrated live blood cells of a 51 year old man who drank

alkaline *BioWater* for four months. *BioWater* molecules are micro-clustered for rapid absorption through membranes into cells and DNA. The result: fast, effective hydration.

#### Dehydrated live blood cells

The photo on the right shows the live blood cells of a 28 year old woman with health problems. Dehydrated,

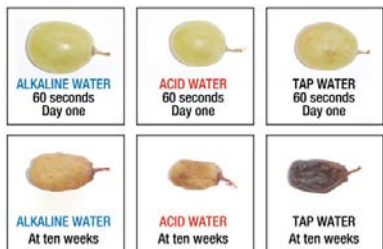

coagulated blood cells struggle to absorb water, nutrients and oxygen for normal cellular health. Toxins accumulate, predisposing organs to degenerative disease.

### Effective alkaline hydration

Hydration matters. Healthy human adult bodies are, by volume, around 70% water. The brain is around 90% water. Dehydration results in the loss of full physical and mental potential. In the simple test below, three grapes were immersed in different containers for 60 seconds each. The first grape was placed in a jar containing alkaline *BioWater*. The second grape was placed in a jar containing ionized acidic water. The third grape was placed in a jar containing Melbourne tap water. All three grapes were then left at room temperature and photographed throughout the following ten weeks.

#### BioWater

The grape immersed in alkaline *BioWater* retained far more moisture, and remained better hydrated, than the acidic water or tap water grapes.

Copyright 2006 BioNatural Australia Pty Ltd

#### Tap water

The grape immersed in tap water lost its natural moisture rapidly. It aged, shrivelled and deteriorated much faster than the remaining two grapes.

#### Acidic water

The grape immersed in ionized acidic water, which has natural antibacterial qualities, benefited from slowed deterioration.

## BioWater 200 water ionizer and filter Product specifications

**Weight** Approximately 6.5kg

**Size** 254 x 125 x 310mm

**Input voltage** AC 220V 60Hz

**Input (consumption) current** 0.5A (125W)

**Pressure range of source tap water** 0.7 ~ 5kgf/cm2

**Temperature range of source tap water** 4 ~ 30°C

**Operating system**

Valve operation

**Operating method**

Sensor operation

**Electrolysis method**

Continuous electrolysis method

**Levels of electrolysis concentration**

1 ~ 4

**Water flow rate**

Approximately 2.5 litres per minute, or 1 litre per minute for improved water quality

**Cleaning method**

Automatic and manual

**Electrolysis / ionizing plate material**

Platinum and titanium

**Internal filter replacement method**

Spring-loaded cartridge for easy replacement

**Internal filter life**

Approximately 6 ~12 months subject to volume and source water quality

**Internal filter composition**

Silver activated carbon, calcium

**Filter life guide**

Red LED display with reset button when changing filter

**Warranty**

Twelve months parts and labour

**Please note:** Use only cold water with the BioWater 200. Warm or hot water will damage the internal components of any water ionizer.
