

Please consider “bring a racer day” on 16th February. ALL are invited and encouraged to participate. Several more of these race days are planned for 2020.

Incorporating 27 team-race. Intended to provide a taste of team-race for novices and those that can no longer compete in the faster races.

AND Bring out what ever racer you would like to do a heat with another of the same kind.

27 Team-race rules (local)

Model specifications.

Model can be any 2.5cc powered model which can take off and land on concrete.

Lines of 15.92m length. 0.385mm multistrand for models that don't fit a particular racing class. F2F = 0.3mm, Vintage-A = 0.3mm, Goodyear = 0.385mm, F2C = 0.35mm. Handle tethers are required.

Fuel tank can be any size, so long as two pit-stops are completed in the 100 lap race.

Fuel shut-offs are recommended.

Race rules.

Speed limit is 27 seconds per 10 laps. Speed to be tested before race, and can be random checked during the race.

If caught speeding you have to shut-off and do an additional pit-stop. A second offence means disqualification from the race.

Races will be 2 or 3 up depending on the pilot skills. Teams can be made up on the day.
